Fiber Optic Network

Interstate FiberNet's 10-state synchronous optical network (SONET) consists of a fiber optic infrastructure that extends nearly 10,000 miles across the southern United States. Equipped with Approximately 175 points of presence (POPs) and state-of-the-art technology, our robust network provides reliable, scalable transmission of your data and voice communications.

A DIVISION OF ITC-DELTACOM

Search

Our fiber optic map displays the fiber routes and POPs that provide the successful transmission of your communications needs, including:

- Owned & operated fiber
- Marketed, managed, and monitored fiber
- Fiber under construction or planned
- Signal Transfer Point (STP) nodes (SS7 Service)
- Points of Presence (POPs)
- Active DMS 500 Switch

Interstate FiberNet offers DS-1, DS-3, OC-3, OC-12, and OC-48 bandwidth across the entire network. Our extensive network in the southern United States allows you to get closer to your customer or network needs thereby reducing costly long local-loop expense from the ILEC.

To learn more about our reliable SONET ring protected routes, [contact us](#) today.

Telephony Services

ITC DeltaCom supports customers with telephony services, such as moves, adds, and changes (MAC). Extended Maintenance Agreements (T&M). Many times, even minor moves, adds, or changes to existing systems can create a burden on an already busy IT staff. With adequate notice, most moves, adds, or changes to your telecommunications system can be done according to your schedule. ITC DeltaCom field engineers arrive at your location fully equipped with the required parts and thoroughly trained to work on your equipment. In addition, ITC DeltaCom provides written quotes, upon request, for any future work. Having our skilled field engineers ready to assume the task of day to day modifications can free your staff to perform duties more valuable to your business.

Services include:

- Maintenance on existing equipment
- Moves, adds, or changes within current location
- Moving equipment to a new location
- De-installation of system components from digital or analog communication interfaces
- Packing equipment
- Site survey as required for complex systems
- Re-installation coordination
- Unpacking equipment
- Re-installing the equipment
- Attaching the appropriate cables
- Running factory recommended tests
- Correction of malfunctions while running diagnostics
- Complete check of installed equipment in the operating environment
- All work is warranted for 90 days

Whether it's the unlimited calls, the most popular features, or the one low price, The Neighborhood has everything you need to change the way you talk. So take a look at the features and benefits that are finally helping people speak freely all across the country.

[check pricing & sign up](#)

Unlimited local, regional and long distance calls

Now your words can cost the same, whether you're talking to someone next door or across the country. Enjoy the freedom of calling anyone, anywhere, anytime — and talking for as long as you want — with The Neighborhood. One low price covers all your state-to-state, in-state, regional and local toll calls, as well as every local call you make.

The most popular features at no extra charge

The Neighborhood isn't just about talking on your phone — it's about getting the most out of it. That's why features like Call Waiting, Caller ID, Speed Dial 8 and Three-Way Calling are included at no extra charge. So you can do things like: see who's calling before you answer, call someone at the touch of a button, get three people on the line whenever you want, and never miss an important call.

Personal Voicemail & Message Center

You don't always have to be on the phone to enjoy the features of The Neighborhood. In fact, our voicemail was built for the times when you're away from it. You can use our "Notify Me" feature to receive e-mail or pager alerts about new voice messages — then check your messages by phone or on the Web through the Message Center.

One company for everything

Now you can get both your local and long distance service — and all the calling features you want — for one price, from one place. The Neighborhood helps reduce hassles by sending you one easy-to-read bill for all your calls and features, and giving you one place to call if you need customer service.

Great partner programs

The Neighborhood doesn't just let you call more places, more often — you have the chance to earn more extras, more often, too. That's because every dollar you spend with The Neighborhood can help you accumulate partner rewards. Click here to learn more.

NETWORK TELEPHONE FACTS

PROFILE

Network Telephone Corp. delivers local and long distance telephone, high-speed DSL Internet access, Web hosting and Web site design tools to businesses in the Southeastern U.S. Using industry-best technology, Network Telephone is able to offer a complete package that meets the demands of business customers at affordable prices.

HISTORY

Network Telephone was incorporated and founded in October 1997 by communications entrepreneur Ray Russenberger, who also founded Network Paging Corp. in 1985 and Network USA (now Metrocall) in 1988. Since that time, Network Telephone has expanded into nine states. The company's management team consists of the industry's most experienced and highly regarded professionals.

EMPLOYEES

Network Telephone's staff includes more than 500 employees at the company headquarters in Pensacola, Fla. and in regional sales offices, including a satellite headquarters in Atlanta. More than 30 percent of the staff resides in the direct sales division.

MARKETS

Network Telephone services 161 market areas in Florida, Alabama, Georgia, Mississippi, Louisiana, Tennessee, North Carolina, and Kentucky.

Network Telephone Footprint

FINANCING

Network Telephone has completed five rounds of equity raises totaling \$320 million in contributed capital. In December 2001, Network Telephone achieved its first major financial milestone becoming gross margin positive three months ahead of schedule. Major investors include Lehman Brothers, Spectrum Equity, Desai Capital, ONSET Ventures, Morgan Keegan, Mellon Financial Corp., Wind Point Partners, Lucent Technologies, and friends & family.

BOARD OF DIRECTORS

Victor E. Parker, Spectrum Equity Investors; Susan Mason, ONSET Ventures; Gerald Thames, Lehman Bros.; Rohit Desai, Desai Capital Management Inc.; Thomas E. Darden, Wind Point Partners.

CUSTOMER SUPPORT SYSTEM

Network Telephone completed implementing an \$8 million Operations Support System (OSS) in June

2001, automating customer management and order fulfillment processes, enabling superior customer care and reducing the cost and time involved with activating new accounts.

VENDORS

Network Telephone's impressive list of technology partners includes: **Lucent Technologies**, **Copper Mountain Networks**, Marconi Communications, Cisco Systems, Polycom, SUN Microsystems, Turnstone, 3Com, **Netopia**, **ADC**, **MetaSolv**, Oracle, DSET and others.

CORPORATE HEADQUARTERS
